

LAOWAN

Laowan combines state-of-the-art wood burning technology with the warm traditional comfort of the cast iron. Pure joy for you and the environment.

Our stoves are designed to use biofuel and pass the highest environmental standards with ease. We guarantee quality and craftsmanship in every detail.

You can find our stoves at qualified retailers. Also visit us at: www.laowan.com

LAOWAN

Cast Iron Stoves

Warmth from within

Pure joy for you and the environment

Our stoves are designed to be enjoyable in every aspect. They are easy to operate with only one control knob. The stoves come completely assembled in transport boxes, ready for easy installation.

The beautiful fire and high comfort of the Laowan stoves make them an excellent investment.

A leap in combustion technology.

These new Laowan stoves have been developed in collaboration with Swedish experts, setting a new state-of-the-art in wood combustion technology.

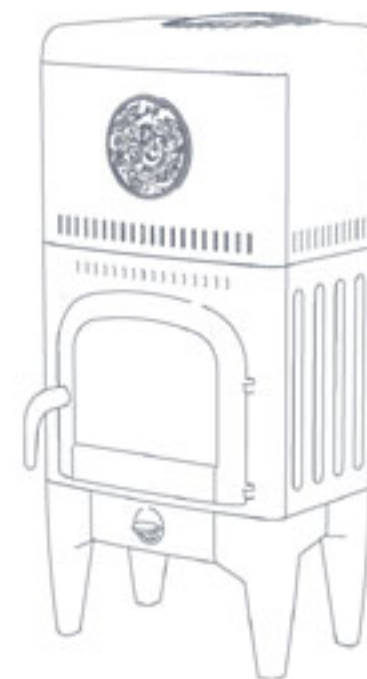

The innovative design of the burn chamber gives our stoves remarkably low emissions. Great care has been taken in designing the combustion chamber to give a perfectly clean screen and a beautiful flame.

Warmth from within

The Laowan Company was established in 1983 and is now China's largest manufacturer of small-scale domestic stoves, cookers and boilers.

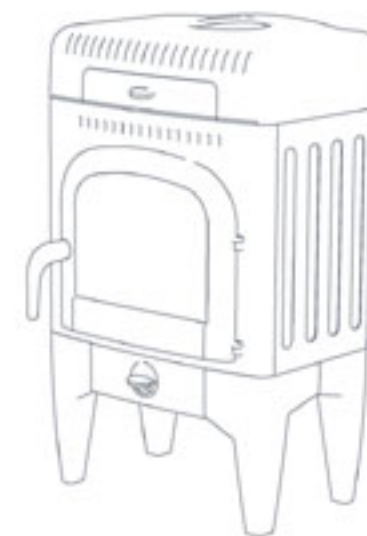

Our stoves have passed both environmental and safety tests at SP, according to the new European standards SS-EN 13240.

S10

The S10 is our largest cast-iron stove. The convection stove gives a nice heat circulation in the room and no glowing hot surfaces. The sides are cooler than on most stoves, allowing it to be placed close to walls. The front is adorned with a Chinese dragon.

Heat output: 6-7 kW
 Fuel: Wood logs, max log length 35 cm
 Material: Cast iron
 Color: Black or grey
 Flue pipe diameter: 150 mm
 Flue exits: Top and back
 Weight: 188 kg
 Dimensions: Height 1240 mm, depth 450 mm, width 530mm

S11

Our compact free-standing cast-iron stove. To achieve the high level of flue convection the smoke bend at the front. That is the reason for the upper ash door at the front.

Heat output: 6-7 kW
 Fuel: Wood logs, max log length 35 cm
 Material: Cast iron
 Color: Black or grey
 Flue pipe diameter: 150 mm
 Flue exits: Top and back
 Weight: 174 kg
 Dimensions: Height 920mm, depth 480mm, width 530mm

S12

The S12 is a cast-iron cassette for installation in new or old fire places. It comes with cast iron grills and side covers.

Heat output: 6-7 kW
 Fuel: Wood logs, max log length 35 cm
 Material: Cast iron
 Color: Black or grey
 Flue pipe diameter: 150 mm
 Flue exit: Top
 Weight: 165 kg
 Dimensions: Height 730mm, depth 480mm, width 530mm
